VMware

Exam 1V0-642

VMware Certified Associate 6 - Network Virtualization 6.2 Exam

Verson: Demo

[Total Questions: 10]

Question No : 1

What are the three functional planes of the VMware NSX architecture? (Choose three.)

A. Routing
B. Control
C. Data
D. Integration
E. Management

Answer: B,C,E

Question No : 2

Which technique best explains the use of the grained policies and network to enable security inside the data center?

A. Micro-division
B. Bifurcation
C. Dissection
D. Micro-segmentation

Answer: D

Question No : 3

An administrator is working in an IT infrastructure where traditional routing methods are followed for routing network traffic. What are the three challenges for an administrator in this infrastructure? (Choose three.)

A. The use of East-West traffic is not secure within a data center.
B. North-South routing methods limit data center scalability.
C. The complexity of routing increases in a multi-tenant environment.
D. A suboptimal traffic route is used to reach destination.
E. Adding new servers to an isolated network became difficult.

Answer: A,B,E

Question No : 4

Which operational mode does the NSX Edge router use to connect to the logical network for load balancing?

A. On-arm
B. Transparent
C. Inline
D. Custom

Answer: C

Question No : 5

In a Software-Defined Data Center (SDDC) that has a distributed firewall, where are the firewall policies enforced?

A. Guest operating system
B. Uplink ports
C. Virtual machine's virtual interface
D. Host

Answer: D

Question No : 6

What is the default TCP port through which the Layer 2 VPN client makes an outgoing connection request in the Layer 2 VPN tunnel architecture?

A. 443
B. 843
C. 440
D. 401

Answer: A

Question No : 7

How can the legacy physical network be simple, stable and reliable when network abstraction is implemented?

A. By leveraging the existing physical devices without configuration changes
B. By automating services for provisioning new services.
C. By configuring new VLANs.
D. By integrating third-party devices with the existing infrastructure.

Answer: A

Question No : 8

A security policy is a collection of security services of firewall rules, or both. Which security service is applied to virtual machines to ensure data security?

A. Virtual machine
B. Guest Introspection
C. Network Introspection
D. SpoofGuard

Answer: B

Question No : 9

How do virtual networks support physical infra structure Quality of Service (QoS)?

A. By receiving the help of the NSX gateway
B. By marking the packets in the encapsulated header.
C. By employing East-West traffic.
D. By restricting the access of VLANs to specific pods

Answer: B

<div style="border:1px solid; background:#e8e8e8; padding:6px;">

Question No : 10

</div>

What are the two operational modes available with VMware NSX balancer (Choose two.)

A. Proxy
B. Setup
C. Baseline
D. inline

Answer: A,D
