Citrix

Exam 1Y0-371

Designing, Deploying and Managing Citrix XenMobile 10 Enterprise Solutions

Verson: Demo

[Total Questions: 10]

Topic break down

Topic	No. of Questions
Topic 1: Installing the Components of a XenMobile 10 Enterprise Solution	1
Topic 2: Designing a XenMobile 10 Enterprise Solution	1
Topic 4: Managing and Maintaining the Components of a XenMobile 10 Enterprise Solution	8

Topic 1, Installing the Components of a XenMobile 10 Enterprise Solution

Question No : 1 - (Topic 1)

Scenario: A Citrix Engineer needs to implement SSL Offload in which traffic is encrypted all the way from the client device to the XenMobile Server. The vServer and service configurations are listed below.

Load balancing vServers:

- Protocol: SSL, Port: 443

- Protocol: SSL, Port: 8443

Services:

- Protocol: SSL, Port: 443 (Bound to 443 vServer)

- Protocol: SSL, Port: 8443 (Bound to 8443 vServer)

The current configuration is NOT working properly.

What should the engineer adjust to implement SSL Offload successfully?

A. Bind Port 80 services to both the 443 and 8443 load-balancing vServers but make no other changes.
B. Bind the port 8443 service to the port 443 vServer; the port 443 service is NOT needed.
C. Bind the port 443 service to the port 8443 vServer; the port 8443 service is NOT needed.
D. Bind Port 80 services to both the 443 and 8443 load-balancing vServers and open port 80 on the XenMobile Server IP Tables firewall.

Answer: B

Topic 2, Designing a XenMobile 10 Enterprise Solution

Question No : 2 - (Topic 2)

Which two statements are true when the database becomes unavailable in a XenMobile deployment? (Choose two.)

A. New devices will NOT be able to enroll.
B. The XenMobile Server will go offline.
C. Enrolled devices are selectively wiped.
D. Worx Store access will continue to function without interruption.

Answer: A,B

Topic 4, Managing and Maintaining the Components of a XenMobile 10 Enterprise Solution

Question No : 3 - (Topic 4)

Scenario: A Citrix Engineer added a new XenMobile Server to a cluster. After making this change, users report sporadic connectivity issues to the Worx Store.

Which step should the engineer take to address this issue?

A. Add the IP address of the new cluster member to the service group member configuration.
B. Create a new NetScaler Gateway session policy.
C. Create a new NetScaler Gateway clientless access policy.
D. Add the node ID to the server ID field in the service group member configuration.

Answer: D

Question No : 4 - (Topic 4)

In which two ways could a Citrix Engineer confirm an Apple Push Notification service (APNs) certificate expiration? (Choose two.)

A. XenMobile Console notifications
B. Certificate details within the internet browser
C. iOS agent notification
D. APNs notification template

Answer: A,D

Question No : 5 - (Topic 4)

XenMobile Mail Manager is blocking an ActiveSync device and a local administrator is unsure about the cause of the issue.

In which two areas could a Citrix Engineer look to troubleshoot this issue? (Choose two.)

A. XenMobile Mail Manager Monitor
B. XenMobile Server Device Details state
C. NetScaler logs
D. Windows Event logs
E. XenMobile Server connectivity check

Answer: A,B

Question No : 6 - (Topic 4)

What must remain consistent between an old and new certificate when renewing an Apple Push Notification service (APNs) certificate?

A. Apple ID
B. Private key password
C. Certificate request server
D. Certificate common name

Answer: A

Question No : 7 - (Topic 4)

What are three reasons why a Citrix Engineer would tag a device? (Choose three.)

A. Enrollment invitations
B. Application deployment
C. Dashboard reporting
D. Policy deployment
E. Role-based Access Control

Answer: B,C,D

Question No : 8 - (Topic 4)

Scenario: A user has lost permission to WorxMail and the application has been uninstalled. However, the user can still access the Worx Store.

Which two sets of logs should a Citrix Engineer gather in order to help diagnose this issue? (Choose two.)

A. XenMobile Server log
B. NetScaler log
C. WorxMail log
D. Worx Home log

Answer: A,D

Question No : 9 - (Topic 4)

In addition to having NetScaler Gateway in the DMZ, what is the Citrix best practice for providing secure access to hosted virtual desktops and Web/SaaS applications from both inside and outside of an organization's network?

A. StoreFront in the DMZ and App Controller in the DMZ
B. StoreFront in the DMZ and App Controller on the LAN
C. App Controller in the DMZ and StoreFront on the LAN
D. StoreFront on the LAN and App Controller on the LAN

Answer: D

Question No : 10 - (Topic 4)

A Citrix Engineer needs to unenroll an iOS mobile device previously assigned to a user and then reassign it to a new user with the least amount of device downtime.

Which action should the engineer take to ensure that the previous user's managed applications and data are NOT accessible by the new user?

A. Full Wipe
B. Device Revoke
C. Selective Wipe
D. Container Lock

Answer: C
