Question: 4

Which statement is true regarding elements? (Choose the best answer.)

- A. Elements have possibly multiple primary classifications, one secondary classification, and one subclassification.
- B. Elements have one primary classification, one secondary classification, and one subclassification.
- C. Elements have possibly multiple primary classifications, possible multiple secondary classifications, and possibly multiple subclassifications.
- D. Elements have one primary classification, possibly multiple secondary classifications, and possibly multiple subclassifications.
- E. Elements have one primary classification, one secondary classification, and possibly multiple subclassifications.

Answer: E

Explanation:

Subclassifications provide a way to feed balances. Elements can have only one primary and secondary classification, but multiple subclassifications. You can create subclassifications or use predefined ones. Once a subclassification is associated with a classification it cannot be associated with another classification. A subclassification name can be reused under different primary classifications, but you will have to create separate balance feeds for each subclassification with the same name.

Question: 5
