## Exam 1z0-525

## Oracle Business Intelligence Applications 7 for ERP Essentials

**Verson: Demo**

**[ Total Questions:   10 ]**

**Question No : 1**

Which statement is true?

**A.** SIL stands for Source Independent Load and is used to move the data from staging tables to Data Warehouse.
**B.** SIL stands for Source Independent Load and is used to move the data from source to staging tables of Data Warehouse.
**C.** SIL stands for Source Intensive Load and is used to move the data from staging tables to Data Warehouse.
**D.** SIL stands for Source Intensive Load and is used to move the data from source to staging tables of Data Warehouse.

**Answer: A**

**Question No : 2**

The Out of the Box BI Applications reports that are included on the dashboards are role based. How do you support these roles specifically in workflows?

**A.** Roles can be supported in workflows by using session variables as filter in permission settings such as enabling access permissions for user groups and data security, defining workflows by guided navigation and column behavior, dashboard links and conditional guided navigation on dashboard sections.
**B.** Roles can be supported in workflows only by enabling session variables in connection pools.
**C.** Roles can be supported in workflows entirely by defining dimensional hierarchies and using the default drill functionality.
**D.** Roles can be supported in workflows only by conditional formatting and using the STYLE session variable.
**E.** Roles can be supported in workflows by user groups, data security, and conditional formatting.

**Answer: A**

**Question No : 3**

The webcat structure, along with various other presentation parameters are stored in:

**A.** DBFeatures.ini
**B.** Instanceconfig.xml
**C.** NQSConfig.ini
**D.** Repository File (.rpd)

**Answer: D**

---

## Question No : 4

Which three calendar types are supported by BI Applications 7.9.6 release?

**A.** Enterprise
**B.** 13 Period, 4-4-5
**C.** Fiscal and Gregorian
**D.** 15 Period

**Answer: A,B,C**

---

## Question No : 5

During what phase does DAC calculate the sequence of the tasks listed under the selected subject area?

**A.** when you 'synchronize" the tasks
**B.** when you "generate parameters" for an execution plan
**C.** when you "assemble" the subject area
**D.** when you "build" the execution plan

**Answer: C**

---

## Question No : 6

Which csv file contains grouping information of natural accounts?

**A.** file_group_acct_codes . csv
**B.** file_group_acct_names.csv
**C.** file_glacct_segment_config.csv

**D.** file_grpact fstmt.csv

**Answer: B**

---

By default how many aging buckets are configured for Accounts Payable/Receivables Aging reports?

**A.** One
**B.** Two
**C.** Three
**D.** Four

**Answer: D**

---

Some users need a new Critical Success Factor or Ratio based on a measure that is not available. How would you help them in a way that is the least time consuming?

**A.** Start looking in the source database(s) for base elements. Next step would be to check BTL if these are already mapped and available in the warehouse. If not, build new ETL, register ETL and new warehouse objects in DAC and model in BI repository. If available, build the new ratio in the Business Model and Mapping Layer, set available in the presentation layer and test in Answers.
**B.** Start looking for base elements in the physical layer in the repository. If available you can directly build the ratio in the Business Model and Mapping Layer, set available for querying in the presentation layer and test results in Answers. If not available, check the warehouse tables and lastly the source tables.
**C.** Directly start building SDE and SIL mappings to enhance the warehouse with extra columns. Register the mappings and new warehouse objects in the DAC, run the ETL and model in the BI repository. Test your work in Answers.
**D.** Build a request in Answers based on the online BI Repository and create your new ratio as a new column based on other columns.
**E.** Build a request in Answers directly on the source data available to you and create the new ratio as a new column in your report.

**Answer: A**

**Question No : 9**

Which two Ports are checked while implementing Slowly Changing Dimension in Oracle BI Application?

**A.** TYPE1_COLLS_DIFF
**B.** SYSTEM_COLLS_DIFF
**C.** TYPE2_COLLS_DIFF
**D.** CHANGE_COLLS DIFF

**Answer: B,D**

**Question No : 10**

After you configured object and data security the user group representatives also express their wish to change the workflow order in the Presentation Catalog available to them. How would you do that?

**A.** Add new reports or reuse existing reports in Answers and modify the column navigation behavior to define the workflow. Add the first report in the flow on a high-level dashboard page.
**B.** Add or modify guided navigation on a Dashboard page. The link should navigate to a report in the workflow.
**C.** Add or modify links on a Dashboard page. The link should navigate to a report in the workflow.
**D.** Answer A and B combined
**E.** Answer A and C combined
**F.** Answer A and E are both possibilities.

**Answer: B**
