---

**Answer: A**

---

---

**Question: 2**

---

The VMware Cloud Director administrator wants to make sure that the system is able to collect log bundles from all cells at once. How should the administrator accomplish this goal?

- A. Install vRealize Log Insight agent on each cell to redirect logs to a centralized location.
- B. Configure a syslog server on each of the cells, and request the logs from the syslog server.
- C. Map the log location on the primary cell to a shared folder on each of the other cells in the server group, ensuring they all have read/write rights on the primary.
- D. Make sure the NFS server allows read-write access to the shared location by the root system account on each cell.

---

**Answer: D**
