Question No : 9

If navigating to www.bbc.co.uk when browsing through a typical Web Proxy - Which one of the following performs the DNS query?

- A. The DHCP Server
- B. The Client's Browser
- C. The Proxy Server

Answer: C

Question No : 10

How are different time zones supported by WIRe?

- A. Each entry is converted to UTC as it is stored, so you can select any time zone in the GUI when searching and see the times according to the user's local time
- B. All entries are recorded only in their local time zone, so you need to calculate the time offset when searching for data of users in different time zones
- C. There is no support for different time zones in WIRe

Answer: A
