Cisco

Exam 650-472

Introduction to 802.1X Operations for Cisco Security Professionals Exam

Verson: Demo

[Total Questions: 10]

Question No : 1

Which protocol used to communicate between the authenticator and authentication server?

A. RADIUS
B. EAP-FAST
C. EAPOL
D. EAP-TLS
E. PEAP

Answer: A

Question No : 2

Which statement correctly defines a persona?

A. A Cisco ISE node can be configured as a primary or backup persona.
B. Persona refers to collections of services running on a Cisco ISE node.
C. A Cisco ISE node can be configured as a wired or wireless persona.
D. Persona relates to the collection of 802.1X services configured on a Cisco Catalyst switch.
E. Persona refers to the collection of EAP methods available to a supplicant.
F. A Cisco ISE node can be configured as a standalone or distributed persona.

Answer: B

Question No : 3

Which two choices are drivers of IEEE 802.1X adoption? (Choose two.)

A. Guest networks
B. Heterogeneous Networks
C. Pervasive Wireless Deployments
D. Unprotected switch ports
E. Limited 802.1X standard functionality

Answer: A,C

Question No : 4

What is the purpose of the guest VLAN on a Cisco Catalyst switch?

A. It provides configurable guest access to devices that have a supplicant but lack local credentials.
B. It provides configurable guest access to non-supplicant devices that lack local credentials.
C. It provides configurable guest access to devices that have a supplicant when the authenticator is down or unreachable.
D. It provides configurable guest access to non-supplicant devices that have local credentials.
E. It provides configurable guest access to devices that have a supplicant when the authentication server is down or unreachable.

Answer: B

Question No : 5

Which module is NOT a valid component of Cisco AnyConnect Secure Mobility Client for Windows?

A. VPN Module
B. Profiling Module
C. Network Access Manager
D. Telemetry Module

Answer: B
Explanation:
These are the VPN modules in Cisco Anyconnect client:
Network Access Manager
Posture Module
Telemetry Module
WebSecurity Module

Question No : 6

Which two choices are valid methods of authorizing a wired supplicant? (Choose two.)

A. EAP-FAST
B. VLAN assignment
C. dACL
D. EAPOL
E. RADIUS

Answer: B,C

Question No : 7

Which two elements must you configure on a Cisco Wireless LAN Controller to allow Cisco ISE to authenticate wireless users? (Choose two.)

A. Configure each WLAN to use the configured Cisco ISE node.
B. Configure all attached LWAPs to use the configured Cisco ISE node.
C. Configure the WLC to join a Microsoft Active Directory domain.
D. Configure Cisco ISE as a RADIUS accounting server and shared secret.
E. Configure Cisco ISE as a RADIUS authentication server and shared secret.
F. Configure RADIUS attributes for each SSID.

Answer: A,E

Question No : 8

Which two of these partial Cisco Catalyst switch commands are used to configure FlexAuth? (Choose two)

A. 3k-access(config-if)# authentication order
B. 3k-access{config-if)# authentication priority
C. 3k-access(config-rf)# authentication fallback
D. 3k-access(config)# authentication direction
E. 3k-access(config)# authentication priority
F. 3k-access (config-rf) # authentication direction
G. 3k-access (config) # authentication order
H. 3k-access (config) #authentication fallback

Answer: A,B

Question No : 9

Whit is the default username and password for Cisco ISE?

A. Admin/admin
B. Cisco/Cisco
C. Admin/Cisco
D. Administrator/ Cisco
E. Administrator/Admin
F. Cisco/Cisco123
G. Admin/Cisco 123
H. Administrator/ Cisco 123

Answer: C

Question No : 10

Which two statements are true regarding communication from the authenticator to the authentication server (Cisco ISE)? (Choose two.)

A. EAP messages are sent encapsulated in RADIUS protocol over UDP port 1645.
B. EAP messages are sent encapsulated in RADIUS protocol over UDP port 1812.
C. EAP messages are sent to the RADIUS server over UDP port 1812.
D. EAP messages are sent to the RADIUS server over UDP port 1646.
E. EAP messages are sent encapsulated in RADIUS protocol over UDP port 1646.
F. EAP messages are sent to the RADIUS server over UDP port 1645.

Answer: A,B
