---

## Question: 5

---

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has client computers that run either the 32-bit version of Windows 8 or the 64-bit version of Windows 10.

You need to install a line-of-business application to the computers. The 64-bit version of the application must be installed on the Windows 10 computers.

Solution: Create one application that has one deployment type. Configure two requirements for the deployment type.

Does this meet the goal?

A. Yes

B. No

---

## Answer: B

---
