# Version: 4.0

---

**Question: 1**

---

How do you calculate a Kubernetes cluster's consistent resource capacity?

Score 2

- A. Microservice amount \* Instance type (e.g. 2C/4G)
- B. Microservice amount \* Average instance amount \* Instance type (e.g. 2C/4G)
- C. Microservice amount \* Average instance amount \* Instance type (e.g. 2C/4G) \* Redundancy
- D. Microservice amount \* Average instance amount \* Instance type (e.g. 2C/4G) \* Redundancy + Autoscale nodes instance type

This is the blank file which was shared for last exam

---

**Answer: C**

---

---

**Question: 2**

---

Which type of instance is used by Alibaba Serverless Kubernetes (ASK)?

Score 2

- A. ECS
- B. ECI

---

**Answer: B**

---

---

**Question: 3**

---

Why is an RDMA network advantageous for machine learning tasks?

Score 2

- A. Because it will accelerate the speed of communication between each node
- B. Because it will improve the performance of an ML job
- C. Because it will save costs

---

**Answer: A**

---

---

**Question: 4**

---

Which Alibaba Cloud service is used to run pods in a serverless cluster?

Score 2

- A. ECS
- B. ECI

---

**Answer: B**

---

---

**Question: 5**

---

For database migration, if the source database uses Oracle database features, which Alibaba Cloud database should you choose for migration?

Score 2

- A. PolarDB
- B. RDS
- C. AnalyticDB

---

**Answer: A**

---

---

**Question: 6**

---

Which of the following is correct regarding Alibaba Serverless Kubernetes (ASK) scaling?

Score 2

- A. Scaling out to 500 Pods takes about 30s
- B. Scaling out to 500 Pods takes about 50s
- C. Scaling out to 500 Pods takes about 90s

---

**Answer: A**

---

---

**Question: 7**

---

How do you collect application log data using Log Service?

Score 2

- A. Configure Kubernetes standard output in Import Data by Log Service console
- B. Configure where to store logs in each pod

---

**Answer: A**

---

---

**Question: 8**

---

Both Federation and Istio can achieve multi-cluster management?

Score 2

- A. True
- B. False

---

**Answer: B**

---

---

**Question: 9**

---

Master nodes managed by Alibaba Cloud support Container Service for Kubernetes (ACK) managed clusters

Score 2

- A. True
- B. False

---

**Answer: A**

---

---

**Question: 10**

---

For Storage migration, Alibaba Cloud provides both offline migration and online migration services.

Score 2

- A. True
- B. False

---

**Answer: A**

---
