Question: 1

A Security policy rule displayed in italic font indicates which condition?

- A. The rule has been overridden.
- B. The rule is a clone.
- C. The rule is disabled.
- D. The rule is active.

Answer: C

Question: 2

An Antivirus Security Profile specifies Actions and WildFire Actions. Wildfire Actions enable you to configure the firewall to perform which operation?

- A. Block traffic when a WildFire virus signature is detected.
- B. Download new antivirus signatures from WildFire.
- C. Upload traffic to WildFire when a virus is suspected.
- D. Delete packet data when a virus is suspected.

Answer: A

Question: 3

An Interface Management Profile can be attached to which two interface types? (Choose two.)

- A. Loopback
- B. Virtual Wire
- C. Layer 2
- D. Layer 3
- E. Tap

Answer: A, B, D

Question: 4

AppID running on a firewall identifies applications using which three methods? (Choose three.)

- A. Application signatures
- B. Known protocol decoders
- C. WildFire lookups
- D. Program heuristics
- E. PANDB lookups

Answer: A, B, D

Question: 5

Application block pages can be enabled for which applications?

- A. any
- B. MGT portbased
- C. nonTCP/IP
- D. webbased

Answer: D

Question: 6

Because a firewall examines every packet in a session, a firewall can detect application _____?

- A. shifts
- B. groups
- C. filters
- D. errors

Answer: D

Question: 7

Finding URLs matched to the notresolved URL category in the URL Filtering log file might indicate that you should take which action?

- A. Reboot the firewall.
- B. Validate connectivity to the PAN-DB cloud.
- C. Redownload the URL seed database.
- D. Validate your Security policy rules.

Answer: B

Question: 8

For which firewall feature should you create forward trust and forward untrust certificates?

- A. SSH decryption
- B. SSL clientside certificate checking
- C. SSL Inbound Inspection decryption
- D. SSL forward proxy decryption

Answer: D

Question: 9

If a DNS sinkhole is configured, any sinkhole actions indicating a potentially infected host are recorded in which log type?

- A. Traffic
- B. WildFire Submissions
- C. Data Filtering
- D. Threat

Answer: D

Question: 10

If there is an HA configuration mismatch between firewalls during peer negotiation, which state will the passive firewall enter?

- A. INITIAL
- B. NONFUNCTIONAL
- C. PASSIVE
- D. ACTIVE

Answer: B

Question: 11

In a destination NAT configuration, which option accurately completes the following sentence? A Security policy rule should be written to match the _____.

- A. postNAT source and destination addresses, but the preNAT destination zone
- B. original preNAT source and destination addresses, but the postNAT destination zone
- C. original preNAT source and destination addresses, and the preNAT destination zone
- D. postNAT source and destination addresses, and the postNAT destination zone

Answer: B

Question: 12

In a Security Profile, which action does a firewall take when the profiles action is configured as Reset

Server? (Choose two.)

- A. The traffic responder is reset.
- B. The client is reset.
- C. For UDP sessions, the connection is reset.
- D. For UDP sessions, the connection is dropped.

Answer: D

Question: 13

In an HA configuration, which three components are synchronized between the pair of firewalls? (Choose three.)

- A. logs
- B. objects
- C. policies
- D. networks

Answer: B, C, D

Question: 14

In an HA configuration, which three functions are associated with the HA1 Control Link? (Choose three.)

- A. exchanging hellos
- B. exchanging heartbeats
- C. synchronizing sessions
- D. synchronizing configuration

Answer: A, B, D

Question: 15

On a firewall that has 32 Ethernet ports and is configured with a dynamic IP and port (DIPP) NAT oversubscription rate of 2x, what is the maximum number of concurrent sessions supported by each available IP address?

- A. 32
- B. 64
- C. 64K
- D. 128K

Answer: A

Question: 16

The Threat log records events from which three Security Profiles? (Choose three.)

- A. Vulnerability Protection
- B. Antivirus
- C. URL Filtering
- D. WildFire Analysis
- E. File Blocking
- F. AntiSpyware

Answer: B, C, D

Question: 17

The UserID feature is enabled per _____?

- A. firewall
- B. UserID agent
- C. firewall interface
- D. firewall security zone

Answer: D

Question: 18

The WildFire Portal website supports which three operations? (Choose three.)

- A. report incorrect verdicts
- B. upload files to WildFire for analysis
- C. request firewall WildFire licenses
- D. view WildFire verdicts

Answer: A, B, D

Question: 19

What are the two separate planes that make up the PAN-OS architecture? (Choose two.)

- A. dataplane
- B. routing plane
- C. signature processing plane
- D. HA plane
- E. control/management plane

Answer: A, E

Question: 20

What are three connection methods for the GlobalProtect agent? (Choose three.)

- A. PreLogon
- B. Captcha portal
- C. UserLogon
- D. Ondemand

Answer: A, C, D
