

IBM

Exam C5050-380

IBM Cloud Platform Solution Architect v2

Version: 8.0

[Total Questions: 63]

Question No : 58

What can be deployed into an IBM Cloud environment to provide on-demand encryption, key management and key storage as a service?

- A. IBM Cloud HSM
- B. Citrix Netscaler
- C. Symantec Secure Site
- D. Fortigate Security Appliance

Answer: A

Explanation: References:

Question No : 59

What factor has a significant impact on the split of responsibilities between the customer and the provider to manage security and associated risks?

- A. Workload and applications running on the cloud
- B. Service level agreement between the provider and the customer
- C. Security level required by the customer for cloud capabilities
- D. Category of cloud service offered by the provider (IaaS, PaaS or SaaS)

Answer: A

Question No : 60

What are the three main types of storage options typically find in an Infrastructure as a Service (IaaS) cloud environment?

- A. File storage, NFS storage, and CIFS storage
- B. Block storage, SSD storage, and Swift storage
- C. Block storage, object storage, and file storage
- D. Storage Area Network, SAS storage, and SATA storage

Answer: C

Question No : 61

How can access to legacy data in a cloud environment be provided?

- A. Implement a two-tier strategy
- B. Implement a firewall pass-through
- C. Implement a hybrid cloud solution
- D. Implement the same hypervisor in both locations

Answer: A

Question No : 62

What two IBM Cloud public infrastructure options allow clients to deploy demanding bandwidth-intensive workloads? (Select two.)

- A. Single vendor DDoS protection
- B. Metered inbound bandwidth for public network
- C. IPv6 transport using Elastic Load Balancers
- D. Direct Link Dedicated Hosting
- E. IBM Cloud Bare Metal Servers with port speeds up to 10Gbps

Answer: C,D

Question No : 63

What would be the effect of selecting cloud storage with insufficient IOPS?

- A. Automatic scaling from block to file storage
- B. An application bottleneck which will degrade performance
- C. A need to provision more virtual machines to cope with the deficit
- D. The fast consumption of storage, leading to a need to frequently provision more

Answer: B
