## **Exam C\_BOBIP\_40**

**SAP Certified Application Associate - SAP BusinessObjects  
Business Intelligence Platform 4.0**

Verson: Demo

**[ Total Questions: 10 ]**

**Topic break down**

<b>Topic</b>	<b>No. of Questions</b>
<b>Topic 1: Configure an SAP BusinessObjects BI platform</b>	<b>1</b>
<b>Topic 2: Describe the Architecture and Administration</b>	<b>3</b>
<b>Topic 4: Design an SAP BusinessObjects BI platform</b>	<b>4</b>
<b>Topic 5: Functions of SAP BusinessObjects BI platform</b>	<b>1</b>
<b>Topic 7: Plan Content and Security Requirements</b>	<b>1</b>

## Topic 1, Configure an SAP BusinessObjects BI platform

### Question No : 1 - (Topic 1)

On a production system landscape, you need to perform maintenance on a host that is currently running scheduled jobs.

What action should you perform on the Adaptive Job Server before shutting down the host?

- A. Disable
- B. Force Termination
- C. Restart
- D. Enable

**Answer: A**

## Topic 2, Describe the Architecture and Administration

### Question No : 2 - (Topic 2)

Which tasks does the Crystal Reports Cache Server perform?

Note: There are 2 correct answers to this question.

- A. Store .EPF files.
- B. Store .ETF files.
- C. Generate .ETF files.
- D. Generate .EPF files.

**Answer: A,B**

### Question No : 3 - (Topic 2)

What does auditing allow you to do?

Note: There are 2 correct answers to this question.

- A. Determine the current status of the servers.
- B. Identify unused reports.

- C. Determine user activity.
- D. Delegate administration to remote systems.
- E. Enhance security of the system database.

**Answer: B,C**

**Question No : 4 - (Topic 2)**

From which server does the Crystal Reports Cache Server request pages?

- A. Report Application Server
- B. Crystal Reports Processing Server
- C. Input File Repository Server
- D. Adaptive Processing Server

**Answer: B**

**Topic 4, Design an SAP BusinessObjects BI platform**

**Question No : 5 - (Topic 4)**

Which of the following databases stores user activities?

- A. Monitoring
- B. Reporting
- C. Auditing Data Store
- D. Lifecycle Management

**Answer: C**

**Question No : 6 - (Topic 4)**

What are the benefits of organizing your existing servers into server groups?

Note: There are 3 correct answers to this question.

- A. Increased fault tolerance
- B. Ability to control which servers execute processing or scheduling requests
- C. Simplified server administration

- D. Optimized network traffic
- E. Simplified disaster recovery plan

**Answer: B,C,D**

**Question No : 7 - (Topic 4)**

How can you achieve horizontal scaling?

- A. Increase the database storage capacity for the Central Management Server system database.
- B. Increase the database storage capacity for the auditing database.
- C. Install redundant processing servers on additional hosts.
- D. Install redundant processing servers on the same host.

**Answer: C**

**Question No : 8 - (Topic 4)**

What are the benefits of clustering Central Management Servers (CMSs)?

Note: There are 2 correct answers to this question.

- A. Enhanced security
- B. Automatic backup of the system database
- C. Fault tolerance
- D. Load balancing
- E. Improved throughput for report processing

**Answer: C,D**

**Topic 5, Functions of SAP BusinessObjects BI platform**

**Question No : 9 - (Topic 5)**

Which tool can you use to find the database type of the Auditing Data Store?

- A. Upgrade Management Tool
- B. Central Configuration Manager

- C. Repository Diagnostic Tool
- D. Central Management Console

**Answer: D**

### **Topic 7, Plan Content and Security Requirements**

#### **Question No : 10 - (Topic 7)**

Three user groups have one custom access level defined for a specific folder. The security requirements have been changed. Now, each of these three groups requires different rights to access the folder.

How can you achieve this?

- A. Use different predefined access levels for each group and apply them to the folder.
- B. Use a predefined access level for each group and apply it to the folder.
- C. Make two copies of the existing access level, modify them, and apply them to the folder.
- D. Modify the access level to allow each group to access the folder.

**Answer: C**
