Answer: AB

Question: 9

You apply SAP support packages to an AS ABAP-based SAP system using the Software Update Manager (SUM).

What is an advantage of using the main configuration setting 'Single system' instead of using the settings 'Standard' or 'Advanced'?

Please choose the correct answer.

Response:

- A. The downtime is shorter.
- B. The overall runtime of the update process is shorter.
- C. The shadow instance is installed on the same host as the primary application server (PAS).
- D. The ABAP load generation is performed on the shadow repository.

Answer: B

Question: 10

You import a transport request using the Transport Management System.

When the import finishes, the transport request disappears from the import queue although it caused a return code 8. What is the most likely reason?

Please choose the correct answer.

Response:

- A. The transport strategy is set to 'queue-controlled single transports'.
- B. Quality assurance is set to 'Delivery after confirmation'.
- C. Quality assurance is deactivated.
- D. The transport strategy is set to 'queue-controlled mass transports'.

Answer: D

Question: 11

Using SAPDOCCD.ini, you have several options for changing the way online documentation is accessed. Which of the following statements are true?

There are 3 correct answers to this question.

Response:

- A. You can change the access path to online documentation, depending on the user ID (in the SAP system) of the user calling help.
- B. You can change the access path to online documentation, depending on the logon language (in the SAP system) of the user calling help.
- C. You can change the access path to online documentation, depending on the release of the SAP system from which help is being called.
- D. You can change the access path to online documentation, depending on the SID (System ID) of the SAP system from which help is being called.

Answer: BCD

Question: 12

You would like to connect two SAP systems using RFC. RFC communication should be possible from each client of the calling system and should connect to three different clients of the target system. What do you need to consider?

There are 2 correct answers to this question.

Response:

- A. No work is required in the remote system.
- B. In this scenario, you need to define three RFC connections of type "3" within each client of the calling SAP system.
- C. For the scenario described, you will need to define three RFC connections in the calling system.
- D. The RFC connection to be defined needs to be of type "M", because multiple clients should be addressable in the target system.

Answer: AD
