- A. Planning strategy 50 (Planning without final assembly) and the corresponding Mixed MRP indicator
- B. Planning strategy 20 (Make-to-Order) and the corresponding individual Collective indicator
- C. Planning strategy 20 (Make-to-Order) and the corresponding Mixed MRP indicator
- D. Planning strategy 50 (Planning without final assembly) and the corresponding individual Collective Indicator.

**Answer: D**

---

**Question: 2**

---

You run MRP for a material that was planned using Demand-Driven Replenishment. Toward which buffer level does the MRP run create a replenishment proposal?

- A. Top of Red Base
- B. Top of Red
- C. Top of Green
- D. Top of Yellow

**Answer: C**

---

**Question: 3**

---

How would you define pegging in the context of Advanced Planning?

- A. An evaluation that is ordered according to the bill-of-material structure of all related products and represents the relationship between the receipt and the issue elements.
- B. An evaluation to verify if there are material or capacity shortages in the network after the production planning run.
- C. An evaluation to verify if there are overstock situations in the balance between receipt and issue elements after the production planning run.
- D. An evaluation that is ordered according to the network structure of all related products and represents the coverage of issue elements with receipt elements.

**Answer: A**

---

**Question: 4**

---

An issue storage location was NOT found through the work center, bill of material (BOM) item, or material master. What determines whether the storage location can be derived from the production version?

- A. Plant Data
- B. MRP Profile
- C. MRP Group
- D. MRP Controller

**Answer: C**

---

**Question: 5**

---

In a production process, you need a certain amount of liquid as input material. The source tank is directly connected to the reactor. How can you process consumption postings?

- A. Kanban
- B. Picking list
- C. Backflushing
- D. Transfer Order

**Answer: B**

---

**Question: 6**

---

You want to reduce planning efforts for B/C materials. Which planning procedure do you recommend?

- A. Manual planning without check
- B. Forecast planning
- C. Material requirements planning
- D. Consumption-based planning

**Answer: D**

---

**Question: 7**

---

Which of the following elements does MRP take into account during net requirement calculation? Note: There are 2 correct answers to this question.

- A. Maximum stock level
- B. Purchase orders
- C. Safety stock
- D. Lot size

**Answer: C D**

---

**Question: 8**

---

Which SAP solutions can be used for forecasting in Supply Chain Planning? Note: There are 2 correct answers to this question.

- A. Supply Chain Management (SCM)
- B. Capacity Requirements Planning (CRP)
- C. Integrated Business Planning (IBP)
- D. Material Requirements Planning (MRP)

**Answer: A C**

---

**Question: 9**

---

What could be the reason for multiple commitment of individual capacities, where several operations have the same scheduled dates on a resource after capacity planning? Note: There are 2 correct answers to this question.

- A. Alternative resources are fully occupied.
- B. The Change Planning Direct on indicator is set.
- C. The work center has several individual capacities.
- D. The planning strategy is infinite.

**Answer: C D**

---

**Question: 10**

---

When do you use variant bills of materials (BOMB)?

- A. When multiple material is have similar BOMB
- B. When a material has multiple BOMB

- C. When multiple material also have the same BOM
- D. When a material has a configurable BOM

**Answer: C**
