

EMC

Exam E20-495

**Content Management xCelerated Composition Platform Application
Development Exam**

Verson: Demo

[Total Questions: 10]

Topic break down

Topic	No. of Questions
Topic 1: Volume A	6
Topic 2: Volume B	4

Topic 1, Volume A

Question No : 1 - (Topic 1)

Consider the following hyperlink:

`http://<server>:<port>/taskspace?objectId=<taskID>&appName=<appName>&docbase=<docbase>`

The application developer needs to configure an email template for an activity that includes a hyperlink directly to the task item.

Which process data item needs to be mapped into the taskID placeholder in the URL?

- A. task.id
- B. task.qitem_id
- C. workitem.id
- D. workitem.act_id

Answer: B

Question No : 2 - (Topic 1)

Which technique in Process Builder is used for pausing the parent process and then passing and reverting control back from a child process?

- A. using the child process template and assigning values for supervisor and child process name
- B. assigning the next activity in the parent process to initiate the child process
- C. defining the next activity in the parent process based on an event triggered by the child process
- D. using the dm_SubProcessInvoke method in the parent auto activity to initiate the child process

Answer: C

Question No : 3 - (Topic 1)

Consider the following business requirements for a work queue.

The priority will be increased at a higher rate if:

Loan requests exceed a certain amount

OR

Loan requests are issued by a preferred loan broker

How can an application developer fulfill these requirements?

- A. Alter the work queue policy and raise the maximum priority.
- B. Change the work queue policy and set the initial priority to High.
- C. Create a priority module and calculate priority and aging.
- D. Modify the activity template and set condition under transition.

Answer: C

Question No : 4 - (Topic 1)

A consultant needs to create a form that shows information for an employee in a firm, including the department in which the employee works. The company has a list of departments in an external database.

Which type of adaptor should be used to populate a list box with all of the departments?

- A. Data Source
- B. Document Processor
- C. Item Initializer
- D. SetValue

Answer: A

Question No : 5 - (Topic 1)

A health organization uses EMC Document Sciences xPression to automate business

communications across the enterprise. The process needs to pass a large amount of static text and several dynamic values to the publishing function to be inserted into the document.

Which Process Builder activity template should be used to meet these requirements?

- A. xPression Publish Document - Mapping
- B. xPression Publish Document - Outbound
- C. xPression Publish Document - Advanced
- D. xPression Publish Document

Answer: C

Question No : 6 - (Topic 1)

An application developer has created a new structured data type and marked it as reportable.

Which additional step must the developer take to enable the structured data type to appear in a report created in PRS?

- A. Mark the structured data type as mandatory on the process template.
- B. Update the structured data type data definitions in the BAM database.
- C. Add the current Process Builder user to the ts_designer role.
- D. Assign the report designer to the ts_designer role.

Answer: B

Topic 2, Volume B

Question No : 7 - (Topic 2)

According to EMC best practices, how should BAM reports that return thousands of records be designed to improve reporting performance?

- A. Use table charts only.
- B. Avoid using activity entities.
- C. Limit drill-downs to one level.

D. Include no more than 5 report entities.

Answer: D

Question No : 8 - (Topic 2)

According to EMC best practices, when deploying an xCP application, which artifacts should be imported into a separate DAR file and deployed to the target environment before the rest of the application?

- A. forms referenced by the TaskSpace application
- B. workflows referenced by the TaskSpace application
- C. business object framework (BOF) objects
- D. structured data types used to create reports

Answer: D

Question No : 9 - (Topic 2)

A Process Data Mapping activity that is configured to be performed on behalf of the Workflow Supervisor assigns a value to an attribute of a package in a workflow. The activity fails to execute, and the resulting error implies the user has insufficient permissions to execute the required action.

According to EMC best practices, how should this issue be resolved?

- A. Update the permissions of the user who started the workflow to grant them Superuser privilege.
- B. Modify the Access Control List that has been applied to the package, granting the user who started the workflow Write permit.
- C. Set the Performer of the activity to be another user who should have permission to update the package.
- D. Set the Performer of the activity to be the Repository Owner.

Answer: D

Question No : 10 - (Topic 2)

An application developer creates a Composer project and then imports a TaskSpace Application From Repository into the project. How must the environment be configured?

- A. The application developer must be part of the ts_designer role.
- B. The Composer project must reference the TCMReferenceProject.
- C. The Upgrade option on the project must be set to Create New Version of Matching Objects.
- D. The dmc_taskspace_app.type artifact must be included in the project.

Answer: B
