Version: 8.0

Question: 1

In the access network technology, which of the following access methods can provide the highest access bandwidth?

A. XG-PON mode
B. ADSL mode 2+ mode
C. VDSL mode
D. GPON mode

Answer: A

Question: 2

Are the following statements correct? In the GPON network, when the T-CONT type is Type 1, the system will only reserve the specified bandwidth for the service.

A. True
B. False

Answer: A

Question: 3

Regarding the T-CONT of ONT, the following statement is wrong:

A. One ONU/ONT can contain multiple T-CONTs
B. T-CONT 1 carries OMCl channel
C. Upstream bandwidth is allocated based on T-CONT. Different services generally use different T-CONT
D. A GEM Port can carry one or more service streams as a service channel.

Answer: B

Question: 4

In the GPON network, there is a long-light emitting ONT, what impact will it have?

A. All businesses are operating normally without impact

B. Other ONTs under the same PON port are offline
C. Other ONTs under the same OLT are offline
D. All of the above

Answer: B

Question: 5

What is the maximum physical transmission distance supported by GPHF in the GPON system?

A. 10 km
B. 20 km
C. 60 km
D. 40 km

Answer: D

Question: 6

The subnet mask 0.0.0.0 cannot exist in the routing table.

A. True
B. False

Answer: B

Question: 7

In the GPON network, what management protocols are running between the OLT and the ONT?

A. OM management
B. OAM management
C. OMCl management
D. DHCP management

Answer: C

Question: 8

Which of the following is not part of the PON network?

A. OLT equipment
B. OAM
C. ODN
D. ONU equipment

Answer: B

Question: 9

Regarding 802.1Q, the following statement is wrong:

A. The TPID value in the 802.1Q Ethernet frame structure is 8100
B. Theoretically, the value range of VLAN ID is 0~4095
C. There are only 4 VLAN priorities in the 802.1Q Ethernet frame structure
D. 802.1Q Ethernet frames are 4 times longer than ordinary Ethernet frames.

Answer: C

Question: 10

In order to realize the user-level traceability of Internet services, as well as more fine-grained user and business QoS control and management, PUPSPV (per user per business per VLAN) of Internet services is planned. The recommended VLAN attribute for SVLAN on the OLT is __?

A. Smart
B. Normal
C. QinQ
D. Stack

Answer: D
