Version: 4.0

Question: 1

Exhibit.

You successfully run the Ansible playbook shown in the exhibit. However, you are unable to see the instances you created.

What is the problem in this scenario?

- A. You have incorrectly entered your key information.
- B. You are viewing the correct region in the wrong VPC.
- C. You are viewing the wrong region.
- D. Your s3 bucket was not accessible during the deployment.

Answer: A

Question: 2

Exhibit.

An exhibit window with a blue header containing the word "Exhibit" and a close button. The main area is white and contains a YAML configuration for a Kubernetes pod.

```
apiVersion: v1
kind: Pod
metadata:
  name: test1
  namespace: test
  annotations: {
    "opencontrail.org/isolation" : "true"
  }
...
```

Referring to the exhibit, which two statements are correct when deploying the Kubernetes pod? (Choose two.)

- A. A pod is created with the name "test".
- B. Pods are reachable by pods in a different namespace.
- C. Pods are reachable only by pods in the same namespace.
- D. A pod is created with the name "test1".

Answer: CD

Question: 3
