NSE6_FVE-5.3 Exam

Fortinet NSE 6 - FortiVoice 5.3

**Questions & Answers
Demo**

Version: 4.2

Question: 1

Refer to the exhibit.

The screenshot shows the 'HA Configuration' dialog box. The 'Mode of operation' is set to 'master'. The 'On failure' action is set to 'switch off'. The 'Shared password' is 'change_me'. The 'Advanced options' section is expanded, showing 'HA base port' as 20000, 'Heartbeat lost threshold' as 30 seconds, 'Remote services as heartbeat' is unchecked, and 'Call recording sync' is checked. There are 'Apply' and 'Cancel' buttons at the bottom.

In the event of a failover, which statement about the configuration shown in the exhibit is true"

- A. Once the unit has recovered from failure the mode of operation changes to slave.
- B. Once the unit has recovered from failure it goes back to its programmed state of master
- C. Once the unit has recovered from failure it stays in idle state until it is manually configured as master or slave
- D. Once the unit has recovered from a failure it shuts down.

Answer: D
