Question: 3

DRAG DROP
You are evaluating business requirements and reviewing each adapter.
Move all of the Adapter Steps to the Adapter review Order column and place them in the correct order.

Adapter Steps   **Adapter Review Order**

| Verify how the application launches outside of Robotic Automation Studio. |
| Verify the number of application instances accessed by the user at the same time. |
| Interrogate each control type that is part of the use case. |
| Identify the technology on which the application is built (web, windows, text). |

Answer:

Adapter Review Order

| Identify the technology on which the application is built (web, windows, text). |
| Verify how the application launches outside of Robotic Automation Studio. |
| Interrogate each control type that is part of the use case. |
| Verify the number of application instances accessed by the user at the same time. |

Question: 4

When performing application discovery, it is important that
you _____ and _____. (Choose Two)

A. write automations to accomplish the basic search functionality of the application
B. interrogate 100 percent of the controls required for the use case
C. interrogate representatives of all controls required for the use case
D. utilize test methods to validate that you can interact with representatives of the controls in the use case

Answer: CD

Question: 5

The business requirement states that the solution is triggered from a screen pop-up when a new phone call is delivered to the user.

When you develop the solution to handle this automation trigger, which two items do you need to consider? (Choose Two)

A. The application type (Windows or Web) in which the screen pop-up starts
B. The total execution time for the automation handling the screen pop-up trigger
C. Another screen pop-up occurs before the first caller disconnects and the first process finishes
D. Multiple configuration items to handle different environments

Answer: AB
