- D. Configure the positioning of the navigation pane within the portal.

---

**Answer: A, B**

---

---

**Question: 5**

---

Which answer best describes the benefit of using screen flows?

- A. Screen flows help a single user complete complex tasks by presenting multiple screens in a logical sequence.
- B. Screen flows help you organize separate tasks into steps so you can control how, when, and by whom work is performed for each step.
- C. Screen flows provide a way to add an assignment to a process that is preconfigured with one or more actions a user can take.
- D. Screen flows provide an easy way to add a step to a process that is preconfigured with functionality, such as sending an email or creating a case.

---

**Answer: A**

---

---

**Question: 6**

---

You created a data transform to concatenate a user's first and last name values. You add the concatenate data transform to a flow action as a post-processing action. What occurs when the flow runs?

- A. The data transform runs after the user enters data in the first name and last name fields.
- B. The data transform runs before every flow action run.
- C. The data transform runs after the flow action runs if the user enters data in the first and last name fields.
- D. The data transform runs every time the user performs the flow action run.

---

**Answer: D**

---

---

**Question: 7**

---

- A. define the properties used in a circumstance
- B. define the values available to an end user in the application
- C. define the values used in a circumstance
- D. define the list of all circumstance values for a rule

---

**Answer: C**

---

---

**Question: 8**

---

Which layer of the Enterprise Class Structure contains assets that cannot be reused in other applications?

- A. Implementation
- B. Division
- C. Organization
- D. Framework

---

**Answer: A**

---

---

**Question: 9**

---

Select two reasons for organizing delegated rules in a separate, unlocked ruleset. (Choose Two)

- A. A separate, unlocked ruleset is necessary because changes cannot be made to rules in a locked ruleset.
- B. A separate, unlocked ruleset allows you to organize the business users responsible for managing the delegated rules.
- C. A separate, unlocked ruleset allows for versioning control of the individual delegated rules in case you want to roll back changes.
- D. A separate ruleset can help prevent accidental or unauthorized changes to critical elements of the application.

---

**Answer: A, D**

---

---

**Question: 10**

---
